The South Central Interior Zone has worked hard again this past year to have a consistency in inspection procedures within the zone. As consistency is a work in progress we strive to increase member participation in our zone meetings by engaging industry professional's to discuss new and existing building products and systems.

Presentations by those within the building industry have included insulation suppliers for batt and spray foam applications, Quiktherm an alternative to conventional basement framing /insulation construction practices and a presentation from Maurice Poitras on HVAC procedures and compliance with 9.32.

Moving forward we will be utilizing a web based format to reach our zone members due to the large zone geographical area and extended travel time to attend. The zone has experienced a steady growth in member participation and introducing an interactive participation component will give members who may not have the ability to attend an option to contribute.

Respectfully submitted
Doug Patan
