## BC BUILDING CODE INTERPRETATION COMMITTEE AIBC, APEGBC, BOABC, POABC

INTERPRETATION	Page 1 of 1
September 17, 2003	
BC Building Code 1998	
Required Frame Wall Insulation	1
Thermal Insulation	
Article 9.25.2.1., Table 9.25.2.1	
	September 17, 2003  BC Building Code 1998  Required Frame Wall Insulation  Thermal Insulation

## Question:

Note (2) of Table 9.25.2.1. permits a reduction of the minimum insulation required for frame walls from RSI 3.5 to 2.45 in areas of 3500 Celsius Degree Days or less, and where the building is heated by natural gas.

The main floor of an existing dwelling is heated with natural gas. If the basement is converted to a secondary suite or a second storey is added to the dwelling and the areas are heated with electric baseboards can the required frame wall insulation in the secondary suite or the second storey be reduced to RSI 2.45?

## Interpretation:

No.

Note (2) of Table 9.25.2.1. only permits the reduction of the minimum insulation required for frame walls from RSI 3.5 to 2.45 where the building is heated by natural gas. If parts of the building are heated with electric baseboard the reduction of the minimum insulation does not apply.

In 1992 BC Building Code, notes to Table 9.25.2.1. also referred to notes in Appendix A. which specified that if 60% of the floor area of a building is heated by natural gas the reduction of the minimum insulation required for frame walls can be applied. The statement making reference to Appendix A still remains in the 1998 BC Building Code but the notes in the Appendix A were deleted.

Local policy should be reivewed with the Authority Having Jurisdiction.

R. J. Light, Committee Chair

The views expressed are the consensus of the joint committee of AIBC, APEGBC, BOABC, and POABC, which form the BC Building Code Interpretation Committee. The purpose of the committee is to encourage uniform province wide interpretation of the BC Building Code. These views should not be considered as the official interpretation of legislated requirements based on the BC Building Code, as final responsibility for an interpretation rests with the local *Authority Having Jurisdiction*. The views of the joint committee should not be construed as legal advice.
