

# BC BUILDING CODE INTERPRETATION COMMITTEE

A joint committee with members representing  
**AIBC, EGBC, BOABC**

**File No: 18-0026**

**INTERPRETATION**

**Page 1 of 1**

<b>Interpretation Date:</b>	October 15, 2019
<b>Building Code Edition:</b>	BC Building Code 2018
<b>Subject:</b>	Schedule B – Item 2.1 – Seismic Restraint
<b>Keywords:</b>	Schedule B, structural components, seismic restraint
<b>Building Code Reference(s):</b>	3.2.1.2., 9.10.4.3.

## Question:

Item 2.1 of Schedule B states “Structural capacity of structural components of the building, including anchorage and seismic restraint”.

Section 15 of the Guide to the Letters of Assurance in the BC Building Code 2006 dated December 2010, describes the approach for fulfilling the requirements for anchorage and seismic restraint for “non-structural elements in buildings, including architectural, mechanical, plumbing, fire suppression and electrical components” in Items 1.6, 3.6, 4.7, 5.9 and 6.5 of Schedule B. The Guide does not provide any guidance on Item 2.1 of Schedule B.

Is Item 2.1 of Schedule B intended to apply to non-structural elements?

## Interpretation:

No

The structural engineer of record is responsible for the structural components as shown on their structural drawings and supporting documents that are submitted to the AHJ for a building permit.

The anchorage and seismic restraint in Item 2.1 of Schedule B applies only to structural elements that are shown on their structural drawings and supporting documents.

Patrick Shek, P.Eng., CP, FEC, Committee Chair

The views expressed are the consensus of the joint committee with members representing AIBC, EGBC and BOABC, which form the BC Building Code Interpretation Committee. The Building and Safety Standards Branch, Province of BC and the City of Vancouver participate in the committee's proceedings with respect to interpretations of the BC Building Code. The purpose of the committee is to encourage uniform province wide interpretation of the BC Building Code. These views should not be considered as the official interpretation of legislated requirements based on the BC Building Code, as final responsibility for an interpretation rests with the local *Authority Having Jurisdiction*. The views of the joint committee should not be construed as legal advice.
