Exam Content Outlines/References

Examinations are based on the job tasks performed by a building or plumbing official/inspector. The Exam Content Outline is a detailed description of the job tasks and shows the number of questions in each job task and content area.

It is very important that you study the Exam Content Outline before you register for and write an exam.

Examination Content Outlines are available at: <https://boabc.org/exam-outlines/>

Examinations are based on the current British Columbia Building Code and British Columbia Plumbing Code, unless otherwise noted.

Examination Challenge and Feedback Process

Challenges on Exam Questions

An examinee may provide feedback or challenge an exam question by submitting a Comment / Challenge Form to BOABC with your signature. Comments/challenges should be submitted to BOABC no later than **30 days following the date of the exam**.

The Comment Challenge form is available on the BOABC website at: <https://boabc.org/wp-content/uploads/2020/03/Exam-Comment-Challenge-Form.pdf>.

- After you complete the exam, if you wish to challenge a question, complete the form identifying the question(s) you wish to challenge by providing as complete a description as possible from your memory of the questions while you were writing the exam.
- ICC staff and BOABC representatives will then identify the question(s) from your description, research the question(s) to determine if the question may have been flawed. Challenge reviews are based on technical merit and processed within **30 days of receipt by BOABC**.
- Following the review, BOABC will then send you a response.

There is a three-step process for test-writers to comment on or challenge the results of their exam.

1. ICC Staff review of challenges and comments submitted by test-writers and consultation with BOABC.
2. If the challenge is denied, the test-writer can appeal the denial to the Exam Development Committee (EDC).
3. If the EDC denies the appeal, the test-writer can appeal to the BOABC Executive Committee.

Submit completed challenge forms by courier to:
Building Officials' Association of British Columbia
Suite 145 – 10451 Shellbridge Way
Richmond, British Columbia
V6X 2W8 Canada

Or by email to: exams@boabc.org

Operational Challenges on Exam Administration

If the comment or challenge is not about the exam technical content, (scheduling problems, proctor complaints) these are considered operational challenges and should be directed to exams@boabc.org.

FAQs

BOABC

Does BOABC require a candidate to have a certain level of experience or education before writing an examination?

No. BOABC does not specify education or experience requirements for qualifying **member** applicants. Examinations are generally difficult for those without practical industry experience.

What is Preauthorization?

Preauthorization verifies that exam candidates are; 1) current members in good standing with BOABC, and 2) eligible to write the requested exam(s).

How often can I write an exam?

A candidate is permitted as many attempts as they require to pass an exam. The candidate must be preauthorized by the BOABC for each attempt. Exams are required to be written in sequence of their levels. However, within each of the three levels there are subtests and those do not have to be taken in order. For example, Level III- Exam 10 can be written before Level III- Exam 8.

How long does my Preauthorization for one exam category last?

Once you are preauthorized to write an exam, you have 6 months from purchase to write that exam. If you do not write the exam within 6 months from purchase, you will need to contact the BOABC to become reauthorized. Once you write the exam you were preauthorized for, that preauthorization ends or is “used”.

You must renew and keep current your BOABC membership to write the exam.

What is the best way to prepare for an examination?

The best way to prepare for an examination is through the study of codes and standards. Nothing can substitute for studying the code and on-the-job experience of code use and application. You must devote the time needed to understand the code and master the ability to apply it.

When will I receive my results?

Results for examinations are available immediately after completion of the examination.

What type of question format will be included in the examination?

Test questions are in four-option, multiple-choice format, with one answer on each question scored as correct. Due to the rigorous psychometric processes used in exam development, questions do not follow patterns (for example, it is not true that: “the most common answer is ‘B’”).

Are the examinations “open-book” exams?

Yes, exams are open book

Can't I just look up all of the answers in the books?

Candidates do not have time to look up all of the answers. For those answers you must look up, you must be VERY familiar with the references to avoid wasting time searching for information. First impressions are often the most accurate, but you may change your answers if time allows.

How long are the examinations?

The length and allowed time varies depending upon the exam category. To get the most updated information on examinations, go to the BOABC Website and click on Exams and then Examination Content Outlines.

How many examinations can I write at one administration?

There is no limit to the number of exams you can write in a day as long as you are preauthorized for the exam. Once you write the exam you were preauthorized for, that preauthorization ends or is used. The Proctored Remote Online Testing Option (PRONTO) is available any time; 24/7, 365 days/year.

Should I guess if I don't know the answer to a question?

There is no guessing penalty, so it is to your advantage to answer every question. Remember to base your answers on the listed references for each exam, not solely on long-time field practices.

What items are allowed/prohibited during the exam?

- The printed 2018 British Columbia Building/Plumbing code book and any associated documentation included within the code book. Papers such as Ministerial Orders or code changes which are photocopies or printed copies may be loose, stapled, taped, or punched and inserted into the ring binding of the code,
- The Code may have notes and may have highlighting,
- The Code may have permanent or temporarily attached tabs such as Post-It notes,
- Blank sheets of paper and writing utensils,
- Printed copies of the planset if applicable,
- Eyeglasses,
- Architects' scale or ruler,
- Battery-operated calculator that is nonprogrammable, not capable of storing examination information, and has no ribbon or paper printing capabilities,
- Foreign printed language/English translation dictionaries, if needed.

The following items are Prohibited:

- "Smart" watch (i.e., Apple or Galaxy watch)
- Any electronic device other than your computer (i.e. any second monitor or screen)

Exam Scoring

What is a passing score?

A passing score is the score set by the Exam Development Committee (EDC) as the minimum score needed to pass the exam. This score is technically called a scale score and is set as 80 for the BOABC exams.

How is a passing score set?

A passing score is set as part of the process at the Exam Development Committee. This part of the process involves setting item-level cut-scores, using the expert judgment of the Subject Matter Experts (SMEs) who are members of the EDC. The SME determines what the minimum score the candidate needs to know in order to obtain the qualification, and a passing score.

What is a scaled score?

A scaled score transforms a raw test score (the number of test questions answered correctly) into another measurement unit called a scaled score. Please note that a scaled score is not the number of questions answered correctly.

Is the current test more, or less difficult than prior tests, or future tests?

There are multiple forms of BOABC examinations. An exam form is a collection of questions, assembled per the content outlines shown at the end of this bulletin, from a larger question bank. While these different exam forms are developed according to the same set of content specifications, the level of difficulty of the forms will vary because different exam questions are randomly selected from the larger question bank. Some of these questions by their nature (as designated by the cut-score) are more difficult than others, even though they pertain to the same content area of the exam.

It would be unfair to require a candidate writing an exam form of somewhat more difficult questions to answer as many questions correctly as a candidate who wrote an easier form. Consequently, a statistical procedure known as ‘scaling’ is used to correct for differences in test form difficulty.

For Example: An elementary school hired the ICC to create an exam to test for knowledge of aspects of mathematics. Further, let’s say the exam was called “Addition and Subtraction,” and the Exam Information Bulletin states it is a 100-question exam.

Look at the first ten questions of two different exam forms, both of which measure the concept of “Addition and Subtraction”:

Question	Exam Form 1	Question	Exam Form 2
1.	$2 + 4 =$	1.	$6 + 9 =$
2.	$6 + 4 =$	2.	$16 + 26 =$
3.	$7 - 3 =$	3.	$18 - 16 =$
4.	$18 + 15 =$	4.	$23 + 99 =$
5.	$16 - 4 =$	5.	$86 - 44 =$
6.	$8 + 8 =$	6.	$5 + 1 =$
7.	$4 + 9 =$	7.	$29 + 88 =$
8.	$20 - 17 =$	8.	$74 - 67 =$
9.	$4 + 15 =$	9.	$48 + 96 =$
10.	$7 - 4 =$	10.	$55 + 38 =$

As you can see, the questions on Form 2 are a bit harder than the questions on Form 1. If these were both 100-question exam forms with such a continuing mix of questions, it would be unfair to require the students who were administered Exam Form 2 to answer the same number of questions correctly in order to pass.

Why scale the scores?

If we simply reported the total number of questions answered correctly (the raw score), there would be a different passing score for each form of the test (because of those differences in difficulty). This would be confusing to candidates. So, we convert these raw scores to a constant scale such that, say, the designated 80 continues as the minimum score required to pass regardless of the form administered, knowing the number of correct answers needed to pass varies from form to form and from year to year.

What is reported?

Scaled scores of 80 or above are reported as PASS. The ICC does not report the numeric score for passing; the score report simply indicates a passing score by saying PASS.

The BOABC exams are only created and maintained with the intent of a passing score reflecting that a candidate meets a minimum level of competency. They are not built, nor intended to be used as a ranking system nor used for determining levels of competency for employment purposes. As no passing candidate can be more minimally competent than another, a candidate that passes with a score of 80, for example, has met the same threshold as a candidate who passes with a score of 95.

Those who fail the exam are provided the numeric scaled score, along with diagnostic information of their performance on major content areas. This information is for self-evaluation only.

Diagnostic Score Report

The diagnostic information for failing candidates is provided in the form of a bar graph. This bar graph cannot be used to determine the exact number of questions answered correctly in each content area. The bar graph gives a general indication from “low” to “high” of the candidate’s performance.

Can my exam score be cancelled?

BOABC/ ICC reserve the right to revoke an examination score if, in their sole opinion, there is adequate reason to question the score validity.

Reasons are:

- Giving or receiving assistance with answers during testing
- Using unauthorized materials during testing
- Failing to abide by the rules presented or directions from the proctor(s)
- Attempting to, or removing, examination materials or questions.

In cases of examination irregularities, the scores of the individual(s) involved will not be released unless approved by BOABC/ ICC. Additional sanctions may be authorized, which may include restrictions on retesting for up to three (3) years.

Some scores may be rendered invalid because of circumstances beyond the examinee’s control, such as faulty examination materials or mistiming. These situations will be investigated. When such occurrences result in cancellation of an examinee’s scores, the ICC will arrange for a makeup examination for the examinees concerned.
