POABC LEVEL I EXAMINATION

Exam Basis

The exam is based on the job tasks performed by a Level I Plumbing Official involved with enforcing the plumbing provisions of the *British Columbia Building Code*. The exam outline is derived from an analysis of the job tasks and is grouped into content areas. The Content Outline shows the number of questions included on the exam for each content area and job task. Each exam question is based on one of the job tasks listed below.

Exam Reference

Questions are referenced to the 2024 British Columbia Building Code Book I and Book II Plumbing Systems. Questions are supported by a Section, Subsection, Article, Sentence, Clause, or Subclause of one of the following:

<u>BCBC Book I</u> Division A, Part 1 (Section 1.2) Division B, Part 3 (Sections 3.7 and 3.8) Division B, Part 9 (Sections 9.14, 9.31 and 9.33)

BCBC Book II All Divisions and all Parts

Exam Format

Two and a half-hour time limit, 72 multiple choice questions, open book (code book may be used during exam).

EXAM CONTENT OUTLINE

LEVEL I – POABC Plumbing Official		
01	General Requirements (Content Area)	24
0101	Service Connections and Fixture Locations (Task)	1
	Inspect piping systems for proper connection to public systems.	•
0102	Qualified Personnel (Task)	
	Verify that piping systems are Installed by qualified personnel with proper credentials to	1
	Inspect piping systems.	
0103	Code Definitions, Usage, and Terms (Task)	
	Communicate with associates, contractors, and the public using code definitions and	5
	accepted trade terms found on supply lists, drawings, blueprints, sketches, and	0
	specifications.	
0104	Plan Reading and Drawings (Task)	
	Read plans and drawings and verify piping systems, fixtures, and appliances are in	
	compliance with code provisions.	
	0104.1 Circuit Vent Name and Sizing	
	Identify circuit vents, proper load, size and length	
	0104.4 Wet Vent Name and Sizing	
	Identify wet vents, proper load, size, and length.	
	0104.5 <u>Water Pipe Sizing</u>	4
	Determine proper water pipe size.	4
	0104.6 <u>Drainage Sizing</u>	6
	Verify drainage pipe sizing complies with code for proper load, size, and drainage.	0
	0104.7 Piping Deficiencies	4
	Review plans for piping deficiencies	
0105	Compliance (Task)	
'	Determine compliance using Alternative Solutions or Acceptable Solutions of the Code.	1
0106	Plumbing Facilities (Task)	2
	Determine minimum required plumbing facilities for buildings and occupancies.	2
02	Materials and Equipment (Content Area)	8

	Conformance to Standarda (Taak)	
0201	<u>Conformance to Standards</u> (Task) Determine conformance to standards for materials and equipment.	5
0202	Location, Clearance, and Access (Task)	
	Inspect the installation of fixtures, traps and interceptors, fittings and materials to	2
	determine they are Installed in compliance with code provisions including clearances,	3
	access and sealing.	
03	Piping (Content Area)	5
0301	Piping Joints and Connections (Task)	2
	Inspect piping system joints and connections for compliance with code provisions.	2
0302	Piping Protection, Support, Sleeves & Penetrations (Task)	
	Inspect piping systems to insure they are protected from corrosion, stress and strain,	1
	freezing, physical damage including proper bedding and backfilling is used, and determine proper support, sleeving, penetrations and waterproofing of exterior openings.	
0303	Required Testing of Plumbing Systems (Task)	
0303	Determine that required tests of piping systems are performed	2
04	Drainage Systems (Content Area)	10
0401	Connection to Drainage Systems (Task)	
••••	Determine the connection of fixtures and piping to sanitary drainage systems complies	0
	with code provisions for approved materials and use of proper fittings, joints, and	2
	connectors.	
0402	Location of Fixtures (Task)	
	Determine that fixtures are located as required by the code for with proper locations,	1
	clearances, protection, pans and seismic restraint.	
0403	Treatment of Sewage and Wastes (Task)	4
	Determine that provisions are made for treatment of sewage and wastes including	1
0404	chemical treatment, high-temperature and neutralization systems.	
0404	<u>Traps</u> (Task) Verify that traps are installed according to code provisions including correct type, size,	2
	design, and location.	2
0405	Drainage Piping (Task)	
0.00	Verify that drainage piping is installed according to all code provisions including size,	2
	location, slope, cleanouts, backflow prevention, sumps, and required ejectors.	
0406	Foundation Drainage (Task)	
	Verify that foundation drainage piping is installed according to all code provisions	2
	including size and location.	
05		
	Venting Systems (Content Area)	8
0501	Vent Sizing (Task)	8 4
0501	Vent Sizing (Task) Verify minimum venting requirements.	
	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task)	4
0501	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting	
0501	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task)	4
0501	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting	4
0501 0502	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements.	4 4 11
0501 0502 0601	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used.	4
0501 0502 06	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving	4 4 11 2
0501 0502 0601	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving Inspect the service and distribution piping for proper Installation of cold and hot water	4 4 11
0501 0502 0601 0602	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving (Task) Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving.	4 4 11 2
0501 0502 0601	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving (Task) Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination (Task)	4 4 11 2 3
0501 0502 0601 0602	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination Inspect the potable water supply and distribution piping for proper protection against	4 4 11 2
0501 0502 0601 0602 0603	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination Inspect the potable water supply and distribution piping for proper protection against contamination.	4 4 11 2 3
0501 0502 0601 0602	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving (Task) Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination (Task) Inspect the potable water supply and distribution piping for proper protection against contamination. Pressure and Volume Requirements (Task)	4 4 11 2 3
0501 0502 0601 0602 0603 0604	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving (Task) Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination (Task) Inspect the potable water supply and distribution piping for proper protection against contamination. Pressure and Volume Requirements (Task) Verify the minimum and maximum pressure and volume requirements.	4 4 11 2 3 4
0501 0502 0601 0602 0603	Vent Sizing (Task) Verify minimum venting requirements. Venting Methods (Task) Determine that wet venting, circuit venting, air admittance valves, and other venting methods comply with code requirements. Potable Water Systems Materials, Joints, and Connections (Task) Determine that approved materials, joints and connections are used. Identification, Sizing, and Valving (Task) Inspect the service and distribution piping for proper Installation of cold and hot water delivery, identification, sizing and valving. Protection against Contamination (Task) Inspect the potable water supply and distribution piping for proper protection against contamination. Pressure and Volume Requirements (Task)	4 4 11 2 3 4

07	Non-Potable Water Systems (Content Area)	1
0701	Non-Potable Systems (Task)	
	Determine that non-potable water systems comply with code requirements including	1
	connections, identification, and location.	
08	Accessibility Requirements (Content Area)	4
0801	Accessibility Requirements for Plumbing Fixtures (Task)	4
	Verify locations and dimensions for installation of accessible plumbing fixtures.	4
09	Hydronic Heating (Content Area)	1
0901	Hydronic Heating (Task)	4
	Verify code compliance for hydronic heating.	I
	Total	72
